

WELCOME

Welcome to Grace Park Animal Hospital! Our wonderful staff is here to provide your pet with the best care possible, in a comforting and compassionate environment. We believe in prevention-based medicine, so we can focus on keeping your pet healthy and preventing diseases. There may be times when your pet is not feeling well or injured, so our doctors and staff are armed with the latest in diagnostic tests and treatment options to get your pet back to health as quickly and painlessly as possible.

Services

Comprehensive Medical Care

Here at Grace Park Animal Hospital, we institute an individualized health plan for your pet based on their individual lifestyle. Not every pet is at risk for every disease, so each recommendation is specifically tailored to your pet. This helps us practice the best possible preventive medicine for your pet. Our doctors also have access to state-of-the-art diagnostics, ranging from full in-house blood analyzers to digital radiography and ultrasound to quickly reach a diagnosis when your pet is sick. Advanced treatment options range from laparoscopic surgery, orthopedic surgery, therapeutic laser, and chemotherapy. Our fully equipped dental suite provides us with the ability to diagnose and treat a wide variety of dental problems, as well.

Doggie Daycamp

Allow us to pamper your pooches (and tire them out!) with our doggie daycamp service. Dogs are separated into play groups based on size and behavior to make sure they are compatible with everyone in their group. Multiple sessions through the day with breaks in our climate-controlled kennel allows dogs to rest between sessions. Outdoor daycamp sessions are closely monitored by our caring staff members in our fenced yard.

Boarding

We also offer boarding services if you need a trusted place for your pet to stay while you are out of town. You can rest easy while you are away knowing that your pet is well cared for by our experienced staff. Pets receive 3 walks per day, with fresh food and water according to how they are taken care of at home. Daycamp sessions and additional individual play sessions are also available at a discounted rate during boarding stays. Is your pet on medication? No problem! We can administer your pet's medications according to their usual schedule while they are here. We treat your family member like a part of ours while you are away!

Grooming and Bathing

We have a full bathing and grooming salon to pamper your pet. Bathing services are available 7 days a week, and our professional grooming staff is experienced with all breeds to give just the right haircut for your long-haired dog or cat. All baths include a complimentary nail trim and ear cleaning.

Convenient Drop-Off Service

Busy work schedules are no problem for us! Just drop your pet off with us early in the morning. A doctor will examine your pet and call you with the exam results and talk about his or her recommendations. Our extended lobby hours (until 7:30pm on weekdays and from 1-5:30pm on weekends) ensures you will have enough time to pick your pet up on the way home from work!

Training

We offer evening classes for basic dog obedience, as well as puppy classes to ensure your pet is a well-behaved member of the family. Classes also provide an excellent environment for socialization of puppies. Have a more serious behavior concern? Our trainer can meet with you for a one-on-one consultation to help!
